

Improve air quality, control dust and reduce waste.

Save time with removable container and disposable plastic liner.

Available in carbon steel or stainless steel.

Compact a pile of empty bags down to an easy-to-manage 4 ft³ (.113 m³) bundle.

Dual pneumatic rams and sturdy compaction plate compress bags consistently and efficiently.

Attach bag compactor to a Hapman bag dump station for maximum dust containment.

Bag disposal access port allows you to insert bags directly into the compactor from the bag dump station for minimum dusting.

Watch the bag compactor in action at www.Hapman.com/compactor.

Run your shifts cleaner, safer, more economically.

- **Protect your employees from dust exposure.** Plus, the system features safety interlocks to provide protection from operational injuries.
- **Save space with the streamline design** that allows operation as a stand-alone unit or in combination with a Hapman bag dump/dust collector.
- **Air-operated system makes the unit safe** for explosion-proof or washdown areas and requires only 3 cfm (0.08 cmm) at 100 psi (7.031 kg/cm²) of compressed air.

Performantee[®]
Designed for results – guaranteed.

A true performance guarantee ensuring your Hapman equipment achieves the specific results it was designed and manufactured to deliver. And if you need technical support, call us. We are available 24/7.
